Ode to Autumn

Rayon has written an Ode to Autumn in relief weaves whose surface patterns are texture deep. Nubby as the earth, pliant as a new leaf, these exciting new fabrics are making their debut in the autumn collections of Schiaparelli, Patou and others.

See the effects . . . blistered, puckered, crinkled, quilted, ribbed and honeycombed . . . glittering with metal and "Cellophane" threads. Supple satins and grainy crepes are created to capture light and shade, and impart new surface character to clothes. White and fragile French rose for evening, and rich stained-glass colours for day.

Expensive looking . . . expensive feeling . . . for the thrifty budget. Rayon washes and irons as casually as cotton and dry-cleans without a protest. Available at fine stores and smart shops everywhere.
